

3D Kinetic LED Screen

Digital Display & Advertising Solution

Series Overview

3D

EXPERIENCE

- A huge customized LED wall made of hundreds of LED modules controls Max.65536 pcs display unit.
- The units to slide forward then back respectively according to the video content.
- The user is able to make infinite creativity design to present an excellent 3D visual effect.

Pixel	SP-R1 Indoor Kinetic Screen Cabinet
Model	250-I
Pitch	Indoor-P1.945
LED Module Dimension(WxH)(mm)	248.5x248.5
Gap between Units(mm)	1.5(1.0~2.0)
Motion Unit Dimension(WxH)(mm)	248.5x248.5 (0.0618m ²)
Resolution of Unit	128x128
Cabinet Dimension(Motion Units Qty)	500×500 (2x2)
Cabinet Thickness (Standby mode) (mm)	320
Max. Forward Stroke(mm)	200
Max. Forward Speed(mm/s)	500
Min. Forward-back Cycle Time(s)	0.5
Motion Qty per Sqm	16
Weight per Sqm(kg/m ²)	52
Max. Power Capacity(w/m ²)	720
Power Supply Requirement	≤3KW:220V Single phase ≥3KW:380V Three phases/Five wires
Screen Brightness(cd/m ²)	≥600
Ambient Temperature(°C)	0~40°C
Environmental Attentions	Indoor, No etchant gas, No inflammable gas, No oiled mist and dust
Heat Dissipation	Open self-cooling (with fan cooling)

Remark: There are multiple options for pixel pitch: P1.5625, P1.945, P2.604, and P3.91. P1.945 has been developed, other pixel pitch options are still under development.

Pixel	SP-CR Indoor Mechanical Screen - Rental Series			
Pixel Pitch	P1.5625	P1.945	P2.604	P3.91
LED Module Size (mm)	248.5x248.5			
Module Spacing (mm)	1.5(1.0~2.0)			
Moving Unit Size (mm)	248.5x248.5 (0.0618m ²)			
Unit Resolution	160X160	128X128	96X96	64x64
Box Size (Number of Moving Units)	500x500 (2x2)			
Box Thickness (Idle Mode) (mm)	320			
Maximum Extension Stroke (mm)	200			
Maximum Extension Speed (mm/s)	500			
Minimum Cycle Time for Extension/Retraction (s)	0.5			
Number of Moving Units per Square Meter	16			
Weight per Square Meter (kg/m ²)	52			
Maximum Power Capacity (W/m ²)	720			
Power Requirements	≤3KW-220V Single Phase; ≥3KW-380V Three Phase/Five Wire			
Screen Brightness (cd/m ²)	≥600			
Ambient Temperature (°C)	0 ~ 40°C			
Environmental Requirements	Indoor use, no corrosive gases, no flammable gases, no oil mist and dust			
Cooling Method	Open self-cooling (including fan cooling)			

Motion Unit Size

248.5x248.5 (0.0618m²)

Cabinet Size(Motion Units Qty)

500×500mm(2×2)

Weight Each Cabinet

13kg

Easy Installation

Independent Software

Easy Maintenance

High-precision control

Ultra-thin gap

- Gap between Units of Indoor 250-I is $\leq 1.5\text{mm}$.
- The precise sliding structure and the extremely fine gap between the screens present more complete and clear content.

Forward Stroke

- The forward stroke can reach 200mm.
- More realistic 3D visual effect.

Precision Machining Technology

- More than 90% of mechanical parts are precision processed.
- Industrial linear guides ensure accurate operation.

Indoor Rear
Maintenance

Maintenance Steps

A

Open the back cover to repair the entire circuit, receiving card, and power supply.

B

Removed the power supply mounting plate, revealing a large hole.

C

The entire motion unit can be removed, and then the motion mechanism and modules can be repaired.

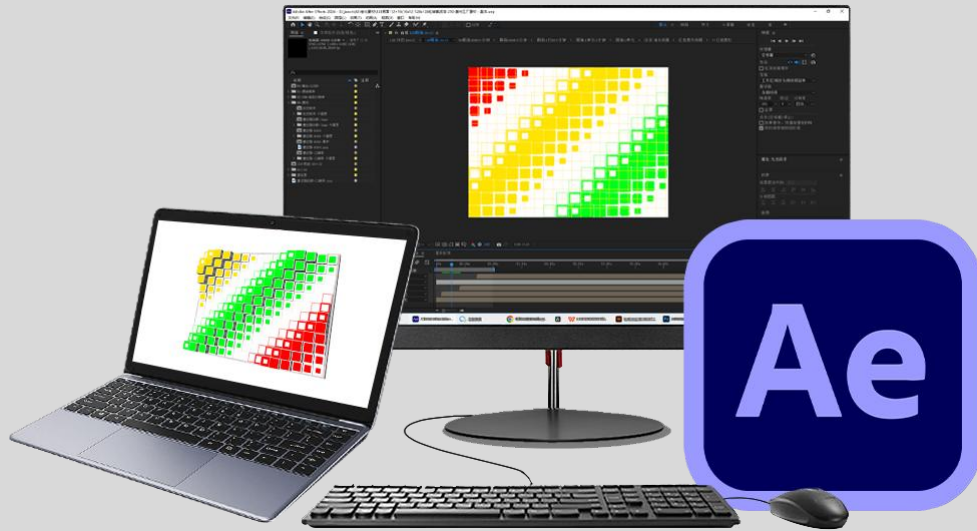

Fixed To Ceiling Structure

Stacking Structure

Put heavy weights in the bottom position to keep the structure steady

- Specifically designed digital content editing software for the screen.
- Simplifies the production process of movies and actions.
- Easily creates a 3D game like creative output.

Quick Output

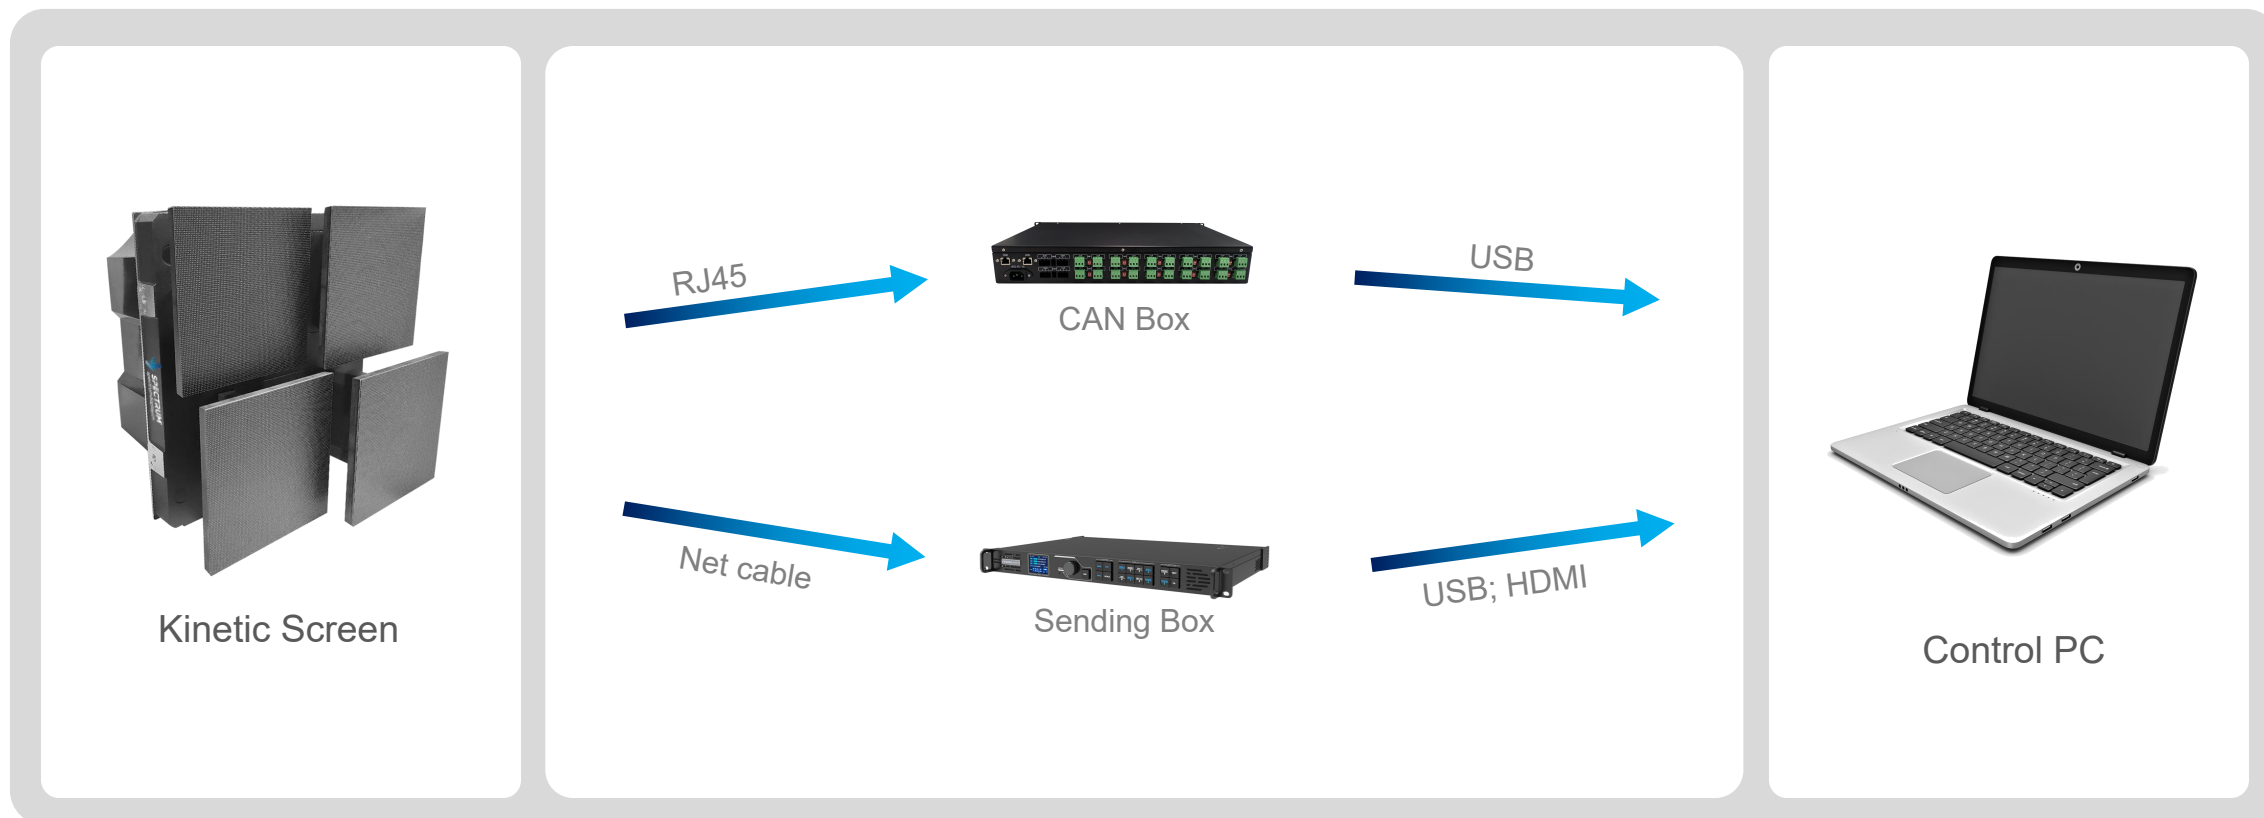

Easy Operation

3D Preview

LED Display Motion Control

The display screen connection is consistent with the LED display connection, while the motion module connection is an additional connection.

Multiple noise
reduction design

Low-noise indoor Max.
